

# Alinhamento de sistemas de robótica educativa com actividades escolares

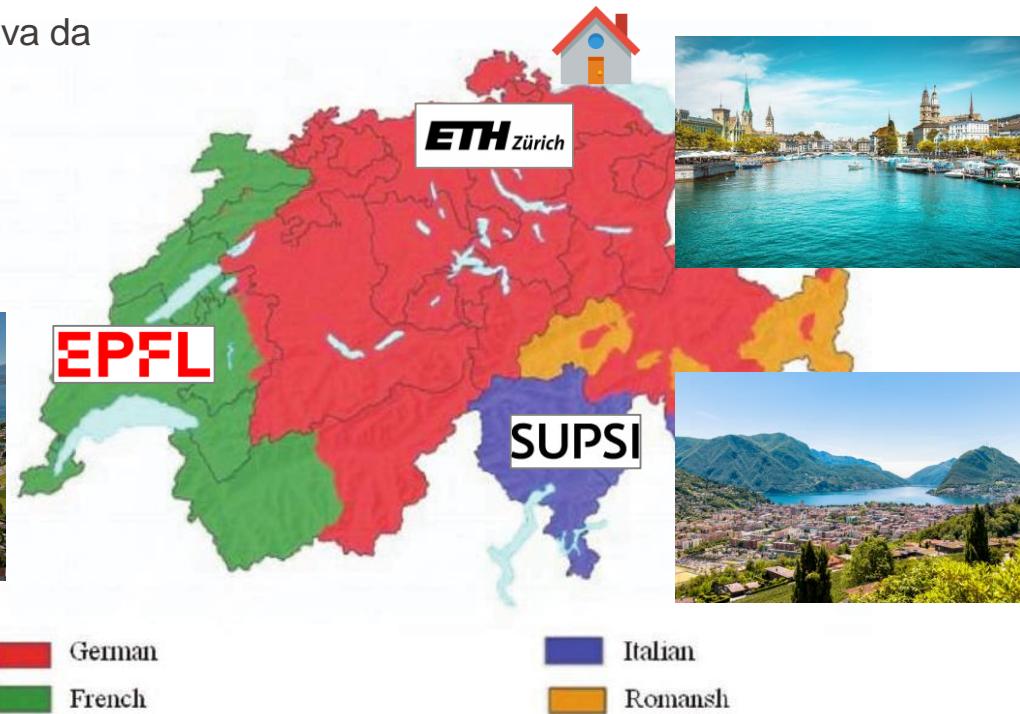

5.º encontro regional de tecnologias na educação  
8 de setembro de 2021

Christian Giang  
SUPSI-DFA & EPFL

# Uma breve lição de geografia

- **2011-2016:** BSc e MSc em engenharia eléctrica da ETH Zurique
- **2017-2020:** PhD em robótica educativa da SUPSI-DFA e EPFL
- **Desde 2020:** Pesquisador PostDoc na SUPSI-DFA e EPFL

# Robôs na educação

## Robôs como tutor / parceiro:

Robótica social, Interacção homem-robô (HRI), Interacção criança-robô (cHRI)

<https://www.br.de/mmediathek/video/professor-roboter-ki-an-der-uni-av:5c36394c9539de0018bd58c6>

<https://bold.expert/what-are-robots-doing-in-schools/>

## Robôs como instrumento:

Robótica educativa (ER)

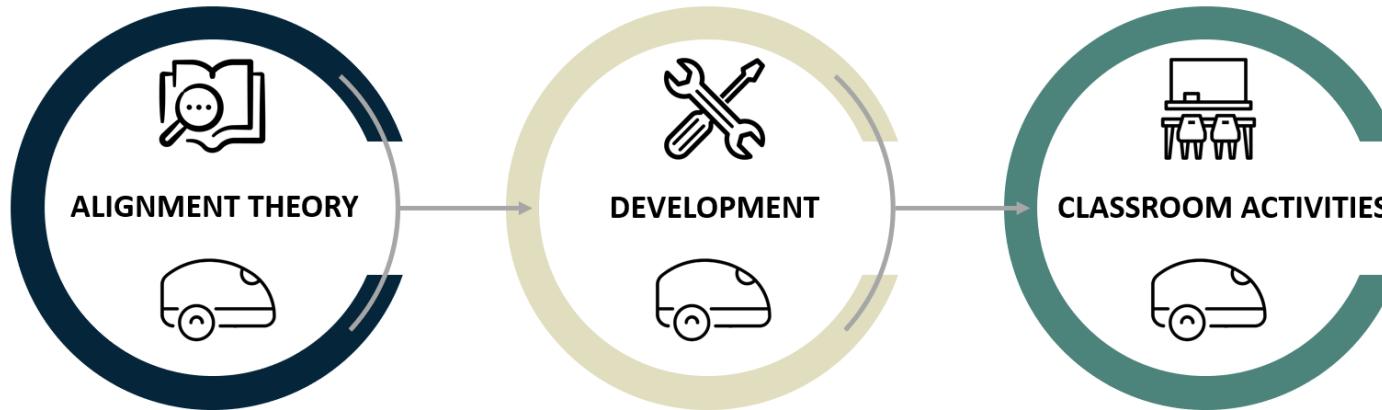

<https://www.mobysa.org/d/e/produit/wireless-thymio/>

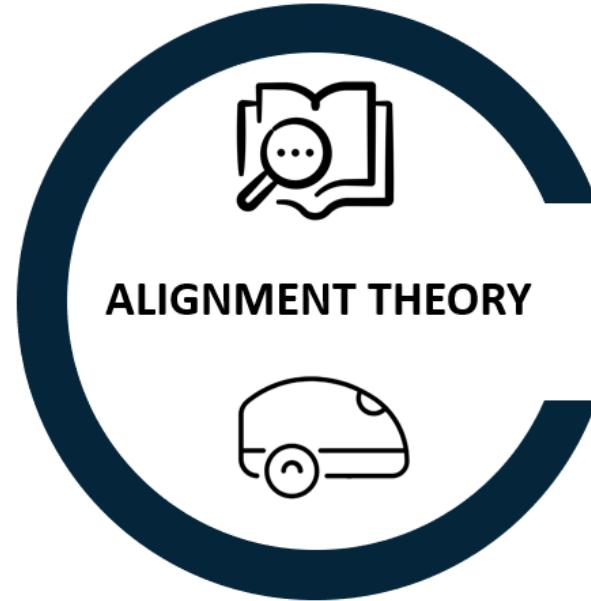

<https://educatec.ch/tts/1270/blue-bot-bluetooth>

<https://educatec.ch/tectools/mbot/2943/makeblock-mbot-bt>

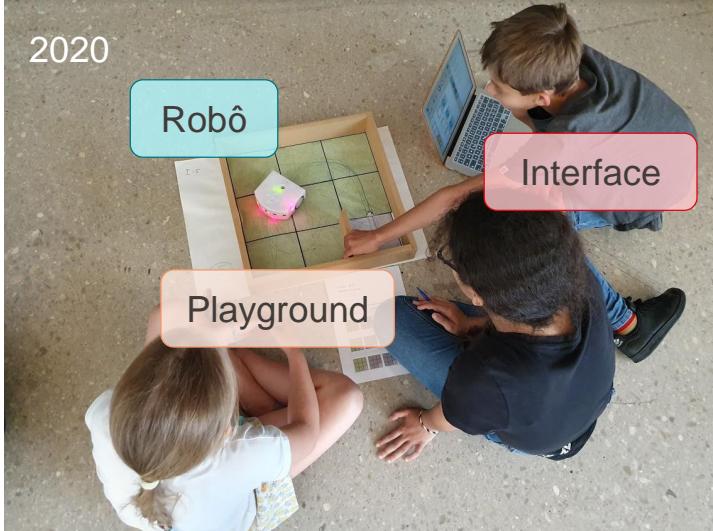

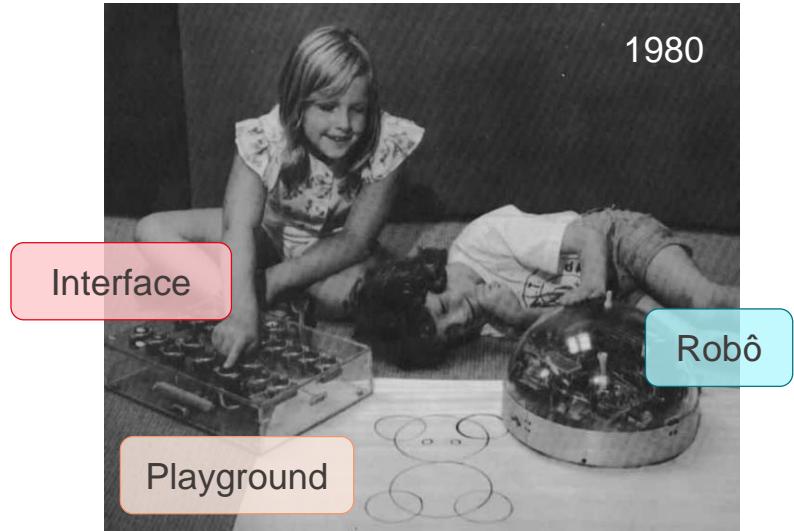

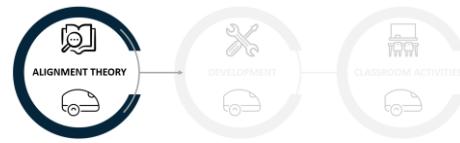

# Resumo da apresentação

Como alinhar a robótica educativa com as actividades de sala de aula?

# Conceptualização de atividades de ER

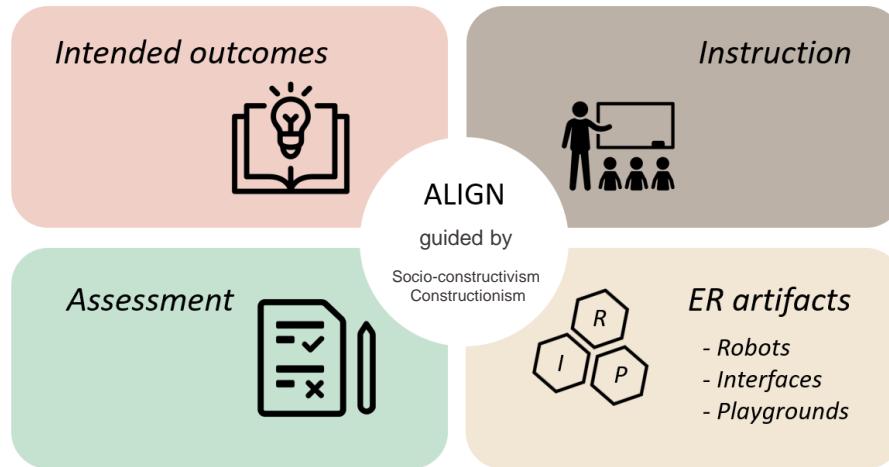

- Sistemas cognitivos situados com três tipos de artefatos cognitivos (Heersmink 2013):
  - Artefato ecológico estrutural (**robô**)
  - Artefato simbólico de representação (**interface**)
  - Artefato ecológico espacial (**playground**)

Heersmink, R. (2013). A taxonomy of cognitive artifacts: Function, information, and categories. *Review of philosophy and psychology*, 4(3), 465-481.

# O modelo ERLS

## Educational Robotics Learning System (ERLS)

Giang, C., Piatti, A., & Mondada, F. (2019). Heuristics for the development and evaluation of educational robotics systems. *IEEE Transactions on Education*, 62(4), 278-287.

Giang, C., Piatti, A., & Mondada, F. (2020). Towards the alignment of educational robotics learning systems with classroom activities. PhD Thesis, EPFL.

- O sistema inteiro deve ser considerado para:
  - Elaboração de instrumentos ER
  - Elaboração das atividades de ER

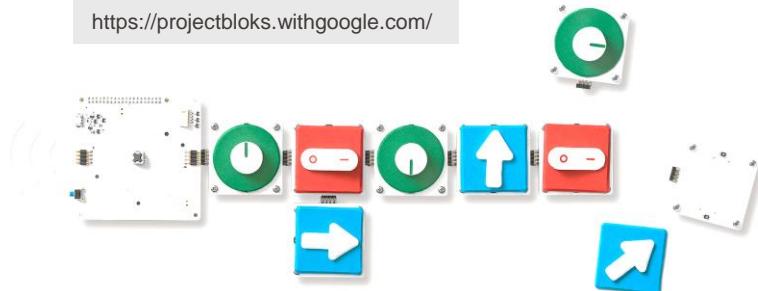

**DEVELOPMENT**

# Programação tangível

<https://projectbloks.withgoogle.com/>

<https://www.playosmo.com/en/>

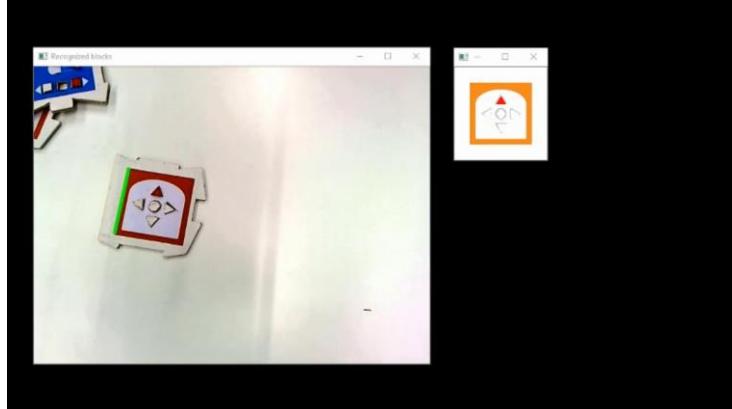

- As linguagens de programação tangível (TPLs) podem:
  - Melhorar a colaboração em grupo (Horn et al. 2008)
  - Aumentar o interesse situacional (Sapounidis et al. 2015)
  - Ter impacto positivo na aprendizagem (Melcer and Ibister 2018)

Horn, M. S., Solovey, E. T., & Jacob, R. J. (2008). Tangible programming and informal science learning: making TUIs work for museums. In *Proceedings of the 7th international conference on Interaction design and children* (pp. 194-201).

Sapounidis, T., Demetriadis, S., & Stamelos, I. (2015). Evaluating children performance with graphical and tangible robot programming tools. *Personal and Ubiquitous Computing*, 19(1), 225-237.

Melcer, E. F., & Ibister, K. (2018). Bots & (Main) frames: exploring the impact of tangible blocks and collaborative play in an educational programming game. In *Proceedings of the 2018 CHI Conference on Human Factors in Computing Systems* (pp. 1-14).

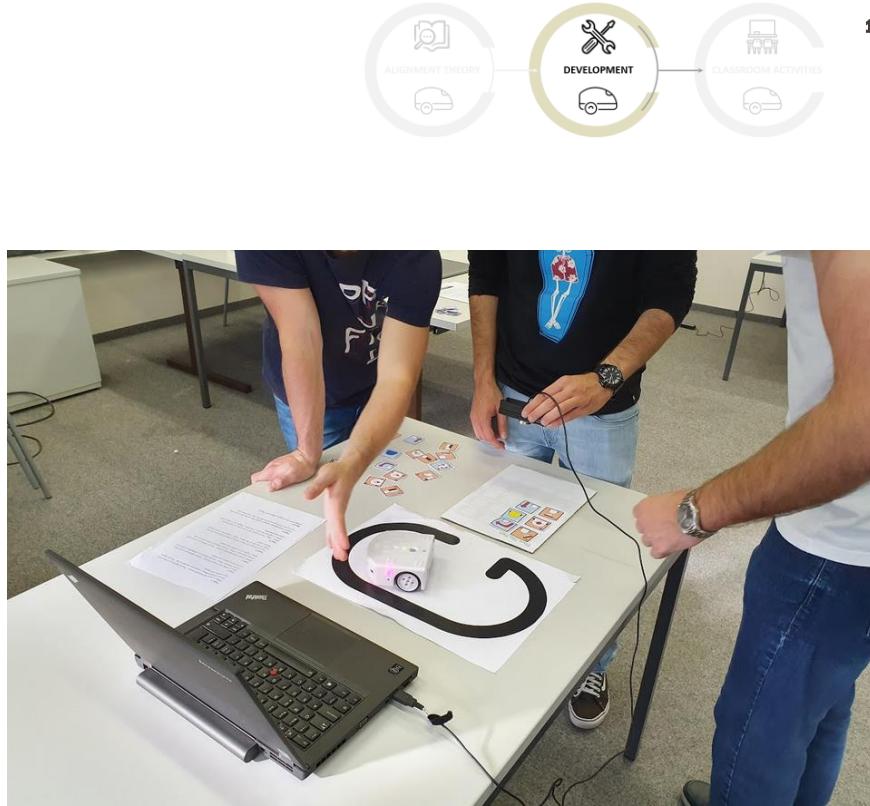

# Thymio TPL

Mussati, A., Giang, C., Piatti, A., & Mondada, F. (2019). A Tangible Programming Language for the Educational Robot Thymio. In *2019 10th International Conference on Information, Intelligence, Systems and Applications (IISA)* (pp. 1-4). IEEE.

- Desenvolver um TPL para o robô Thymio que:
  - Seja acessível e facilmente reproduzível
  - Explora a infra-estrutura de sala de aula existente

# Thymio PaPL

Mehrotra, A.\*, Giang, C.\*., Duruz, N., Dedelley, J., Mussati, A., Skweres, M., & Mondada, F. (2020). Introducing a Paper-Based Programming Language for Computing Education in Classrooms. In *Proceedings of the 2020 ACM Conference on Innovation and Technology in Computer Science Education* (pp. 180-186). (\*) equally contributing authors

# Estudo piloto

Classe A  
(n=16)

Classe B  
(n=16)

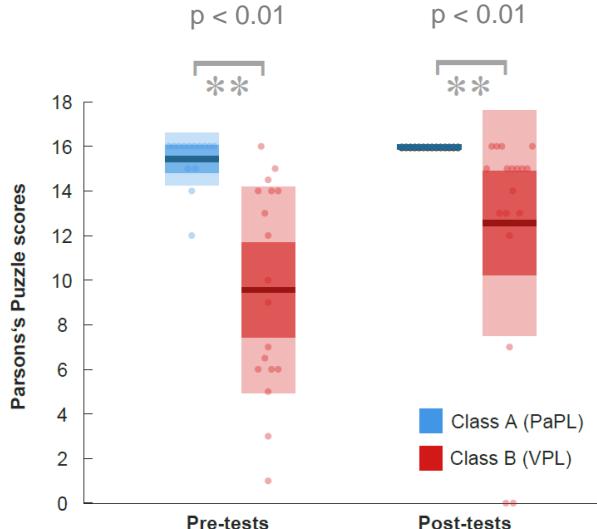

Introdução a  
Thymio (25')

Atividade PaPL (25')

Atividade VPL (25')

Atividade VPL (25')

Atividade PaPL (25')

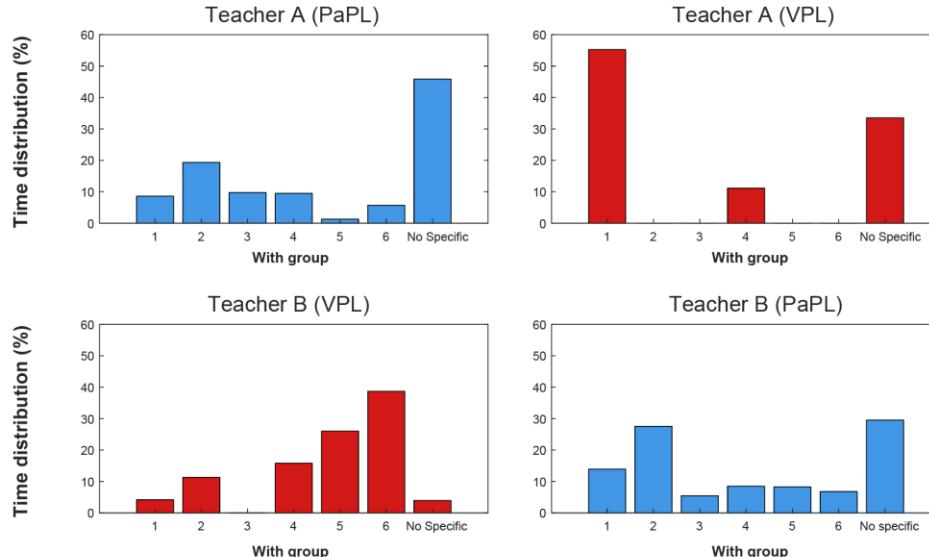

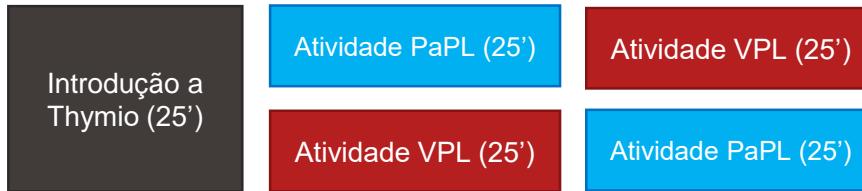

# Estudo piloto

**Classe A**  
(n=16)

**Classe B**  
(n=16)

- Linguagem de programação e robô educativo baseados em papelão
- Material e componentes acessíveis
- Introduzir professores e alunos às idéias de *making*
- Proposto no ensino à distância durante o fechamento da Covid-19

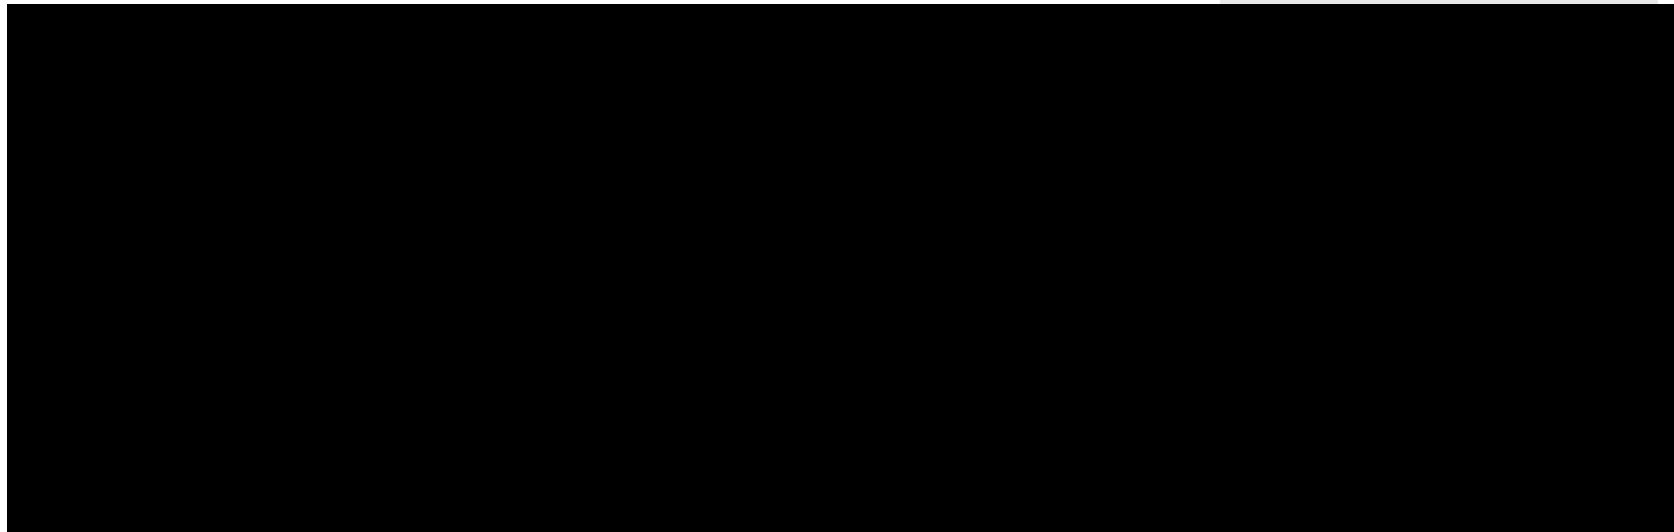

Mehrotra, A., Giang, C., El-Hamamsy, L., Guinchard, A., Dame, A., Zahnd, G., & Mondada, F. (2021). Accessible Maker-Based Approaches to Educational Robotics in Online Learning. *IEEE Access*, 9, 96877-96889.

**CLASSROOM ACTIVITIES**

# Thymio Escape Game

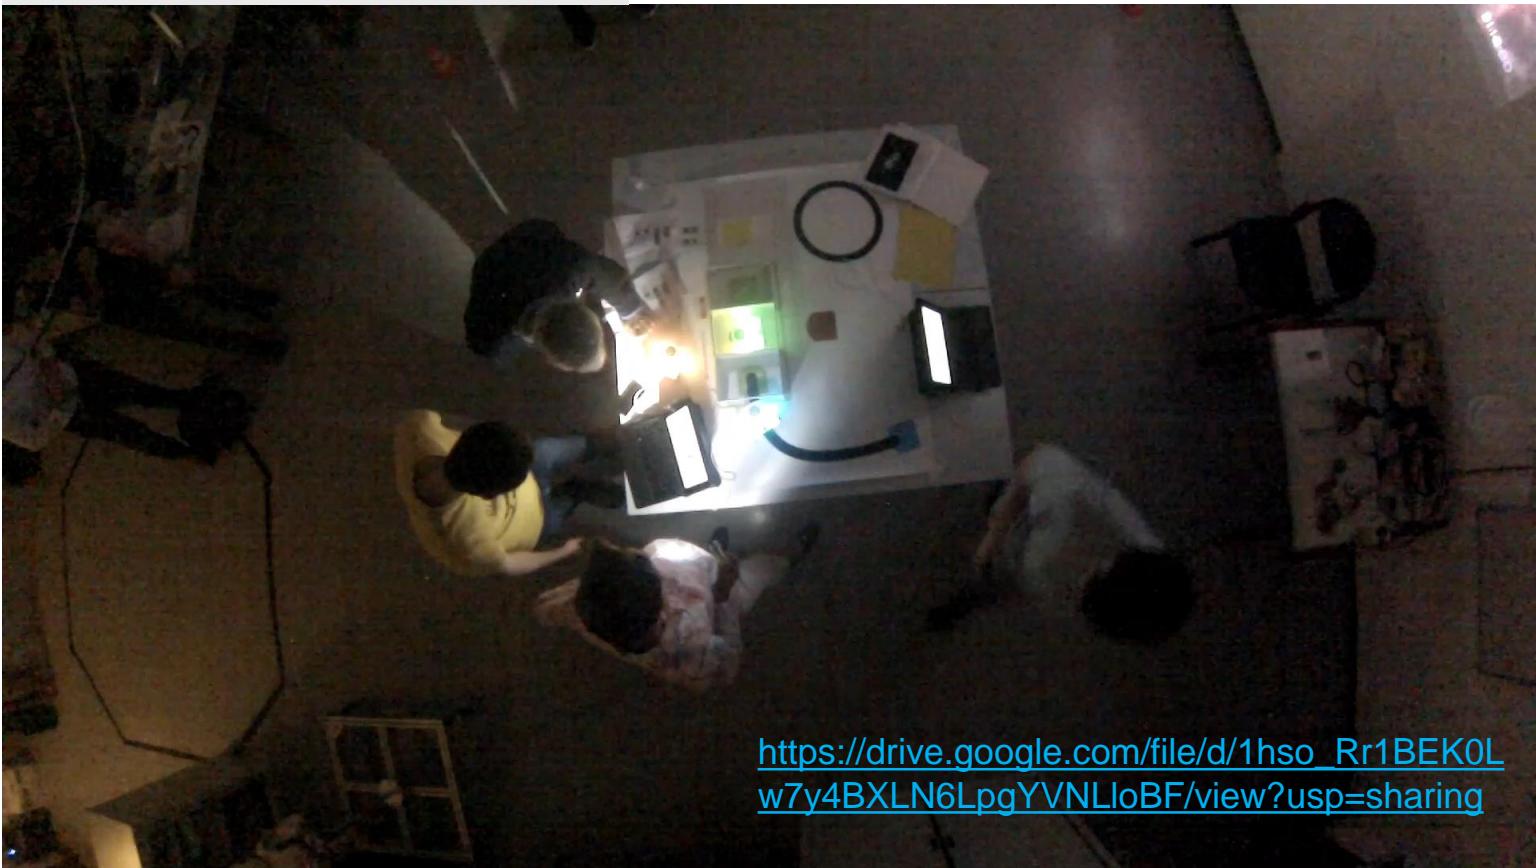

- Os jogos de fuga e as atividades de ER são ambos baseados em uma abordagem sócio-construtivista
- Potencial para alinhar instrução com artefatos de ER

Giang, C., Chevalier, M., Negrini, L., Peleg, R., Bonnet, E., Piatti, A., & Mondada, F. (2018). Exploring escape games as a teaching tool in educational robotics. In *International Conference EduRobotics 2018* (pp. 95-106). Springer, Cham.

# Thymio Escape Game

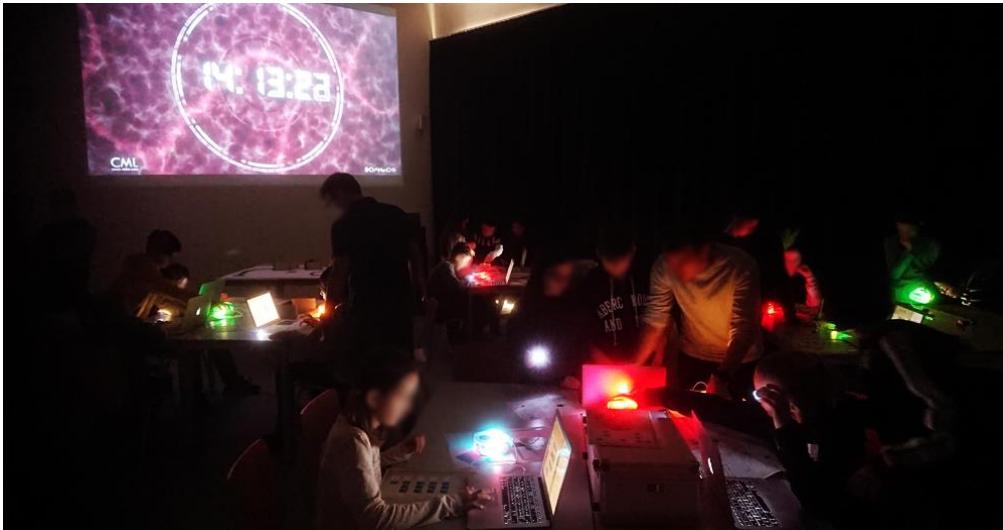

Vídeo de Jerome Guzzi e Alessandro Giusti

# Thymio Escape Game

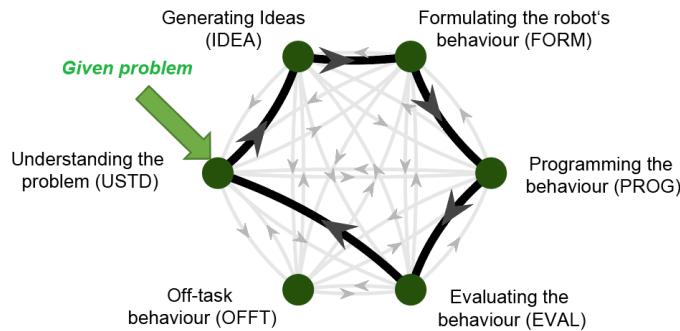

- O material está disponível sob licença CC BY
- Adaptado de forma autônoma por professores em diferentes países
- Jogado por mais de 700 pessoas

Giang, C.. (2019). THYMIO ESCAPE GAME - Documentation (EN).

# Thymio corta-relva

- 40 minutos de atividade em grupos de 2-3 alunos
- Duas condições: Cinco grupos sem restrições, Cinco grupos com restrições de tempo (acesso à interface bloqueado)

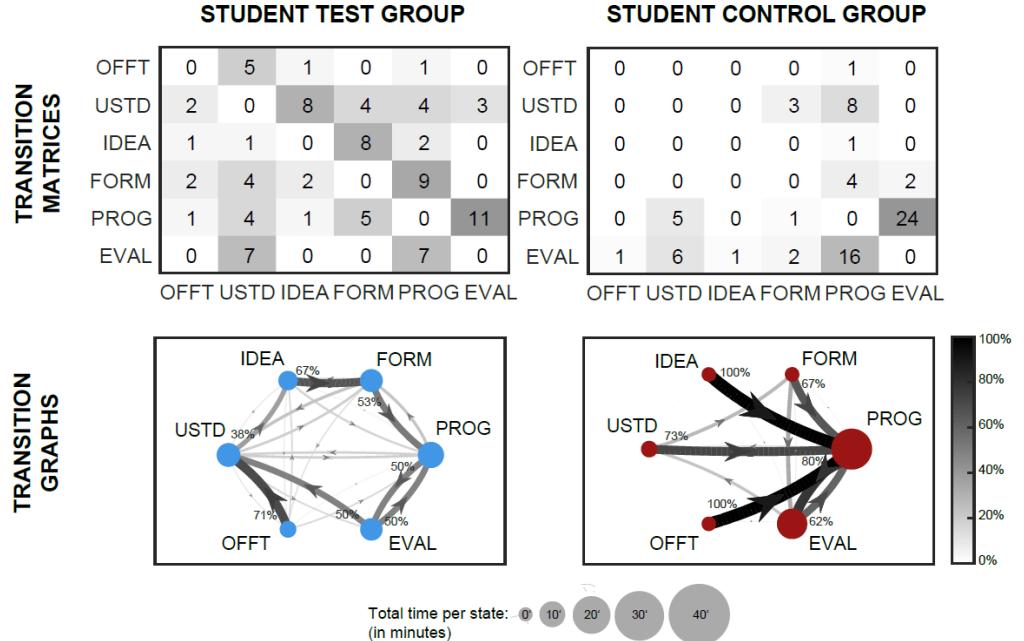

Chevalier, M., Giang, C., Piatti, A., & Mondada, F. (2020). Fostering computational thinking through educational robotics: A model for creative computational problem solving. *International Journal of STEM Education*, 7(1), 1-18.
